

## PRESS RELEASE

---

FOR IMMEDIATE RELEASE **July 22, 2004**

### **SCROGGIN NETWORKS OFFERS KIOSK SERVICES IN NORTHEAST LOUISIANA**

Monroe, La.— Scroggin Networks, a company specializing in Internet network integration in Northern Louisiana, announces today that it is now offering Internet kiosk services. The goal is to install kiosks in various locations throughout the 318 area code. This will make Internet access available to the public almost anywhere, so people can stay connected while on the go.

Internet kiosks provide public Internet access quickly and easily for any and all users. There are many growing uses for Internet kiosks in a variety of locations including hotels, airports, train stations, shopping malls, convenience stores, laundry mats, and tourist attractions wanting to provide convenient and instant check-in, shopping, and information. Popular uses include surfing the Web, sending and receiving email, checking stock quotes or the weather and more.

“Scroggin Networks’ Internet Kiosks provide a way for businesses to attract customers, build customer loyalty, and increase their revenue streams while supporting the evolving communication habits of the population today,” comments Jerry Scroggin, owner of Scroggin Networks. “This makes them more competitive. We provide quality equipment, maintenance, and support to make this a simple and profitable service.”

#### **About Scroggin Networks**

Scroggin Networks is a West Monroe, La based company that specializes in Internet network integration, workstation configuration, security (firewalls), anti-virus solutions, router configuration, VPN encryption, network design and cabling, Web viewable cameras, remote and on-site administration, mail and file servers, and UNIX system administration. Owner Jerry Scroggin is also the founder, co-owner and general manager of Bayou Internet, the largest independent Internet Service and Communications Provider in Northeast Louisiana. Current Scroggin Networks contracts provide 11 talented network technicians, engineers and system administrators, providing specialized skills in all areas served.
