### Are You Still Using Internet Explorer 6?

If so, you may not be seeing the internet the way it was intended. Internet Explorer 7 has been out since 2006 and Internet Explorer 8 has just recently been released. In almost all cases upgrading to version 7 or 8 will drastically improve your enjoyment of the web. In addition to displaying web pages more accurately versions 7 and 8 also display web pages faster saving you valuable time. And Internet Explorer isn't your only option. Mozilla's Firefox browser is an excellent choice for anyone having trouble upgrading Internet Explorer. Browsers from Google and Opera are also viable options. Upgrade your browser and see the web in a whole new light.
