Tips to Avoid getting a Virus

Never install software, enable services or allow remote access to your computer unless you are 100% certain of what you are doing. Try and store important documents on CDs, DVDs, or USB devices. Never download files from unknown sources. Many offer temptations like flash games, music, movies, or videos, but do not be tempted. Look after your computer and your peace of mind and work will be undisturbed.

If you believe that your computer may have a virus, call 888-30-BAYOU and we will be glad to help you eliminate the problem.

Our Local Representatives can save you up to **40%** off your telephone lines and internet service!
